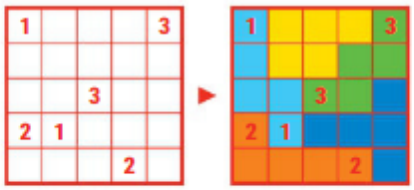
SQUARED AWAY

BY RODOLFO KURCHAN

Divide each N×N square into N pieces, each having area N, so that the same number appears in each piece. (Some pieces will not have numbers.)

ANSWERS, PAGE 76

EXAMPLE



THIS 5×5 SQUARE SHOULD BE DIVIDED INTO 5 PIECES EACH MADE OF 5 SQUARES.

SNAKES INSIDE BOXES

BY RODOLFO KURCHAN

Your goal in these puzzles is to fill all of the boxes in the diagrams with snakes of the indicated lengths. Each snake starts at a number, which indicates its length (the number of boxes it occupies). Snakes can go straight or turn at right angles, but no 2x2 area of boxes may contain the same snake. See the examples for correct and incorrect solutions.
